

## Provoke Top Growth 0.03% (Gibberlic Acid)

**Provoke Top Growth** is an excellent growth promotion product for transition, over seeding, new seeding and laying new sod. **Provoke Top Growth** can be used on tees to promote new growth in turf regeneration.

**Provoke Top Growth** is a proprietary blend of Humic acid, Cytokinins, Indoles, Auxins, and Gibberlic acid used to help aid grasses to fill into areas where there is little to no growth, giving you an overall lusher healthier stand of turf. Also can be used in areas where heavy traffic has placed stress on the condition of the turf. The **Humic Acid** acts as the carbon source to feed microbes. **Cytokinins** are cell division factors, which rapidly divides cells. **Indoles** - are naturally occurring plant growth promoters for root development and bud initiation. **Auxins** - promote rooting and cell enlargement. **Gibberlic acid** has been used successfully in the spring to induce growth in bluegrasses and Bermuda grasses.

Should not be used with Growth Regulators since it will offset the GA suppression.

Application Instructions		
Application	Rate Per 1000sq.ft	Frequency
All types of warm and cool season grasses	3-10 ounces	Apply every 14-21 days
House Plants & Gardens (Foliar spray)	1 Tablespoon per quart of water (Apply a light mist to leaves until point of runoff)	Apply as needed

To ensure compatibility with foreign products, a jar compatibility test is recommended. Always fill tank with water first, then add product while tank is circulating. NEVER MIX CONCENTRATES DIRECTLY TOGETHER
