

TerraMax Inc. Tazo B Dry Turf Seed Treatment

- **TAZO™** has been shown in University and TerraMax studies to effectively increase root mass and top growth in turf grass when applied topically to the turf.

TAZO™ contains Azospirillum, a bacteria that has been shown to:

- Fix atmospheric nitrogen
- Produce plant like compounds that stimulate root growth and development

TerraMax proprietary formulation technology has allowed for the potential of Azospirillum to be realized.

Trials conducted at University of Nebraska have confirmed TerraMax observations. That study showed statistically significant improvement in root mass 125 days after planting Bluegrass.
